

Patches

Lillian Ross

Patches is my kitten.

Me and my family got her on Saturday, January 26, 2026.

Her belly is white, the rest of her body is either orange or black. Patches ears are pink on the inside with a little bit of hair on the sides. Her whiskers are so long! Her mouth looks like she drank chocolate milk and then spilled it down the side, it is so cute. But it wouldn't be good if Patches actually drank chocolate milk cause cats and even dogs can't have chocolate! Patches back right foot looks like she stepped into a bucket of black paint!

She likes to walk around my house and touch things with her paws. She also likes to sleep a lot next to or on top of me! At night when I sleep with her she lays in my arms or above my head on my pillow. Speaking of night time she once woke me up at 2am and mom had to put her downstairs.

She also loves to play sometimes if I throw a stuffed animal she'll run for it and attack it like it's going to eat her! Patches also likes to play with a ball of string when I'm trying to crochet she'll hit at its with her paws.

Sometimes when I try to pick her she scratches me. She is so cute on the outside but a tiger on the inside! "Grrrrrrrrrrrr" says Patches.

Sometimes when I'm sitting next to her she'll take her paws and rub them against my leg.

My friends Grayson and Hudson came to meet her they love her!

One time she went under the closet and stood up on her hind legs we thought she was gonna get hurt but she was okay thank goodness. One time she went in our travel tree she got tangled in the lights! My parents had to cut her out it was scary.

I've always been a dog person and I never thought I'd say it but I'm a cat person!
